

Suva® 134a(R-134a) Replaces R-12

Suva® 134a is a long term HFC replacement refrigerant for R-12. Applications include retrofit and new installations of medium and high temperature stationary commercial refrigeration and chiller equipment. Suva® 134a has also become the standard in many new appliance applications.

Benefits :

Stationary commercial refrigeration applications

- new equipment and some retrofit
- retrofit -lose capacity vs. R-12 if below 20°F evaporator.

Centrifugal chillers

New equipment and retrofit.

New equipment

Medium/high temperature applications.

Easy servicing

Can be repeatedly topped off, leak after leak.

Safe and easy to use

A1 ASHRAE safety classification, EPA SNAP accepted. UL recognized.
