

Suva® 410A(R-410A) Replaces R-22

Suva® 407C is a long-term HFC replacement for R-22 in positive displacement residential and commercial air conditioning equipment. Suva® 407C offers improved performance over R-22.

Suva®407C is a higher-pressure refrigerant than R-22 and should be used ONLY in equipment specifically designed for R-410A.

Benefits :

Higher capacity equipment

Equipment designed for Suva®410A has up to 60% greater capacity than current R-22 equipment.

Easy servicing

Can be repeatedly topped off, leak after leak.

HFC refrigerant

No phase out date.

Safe and easy to use

A1/A1 ASHRAE safety classification, EPA SNAP accepted. UL recognized.
