

Suva® 95(R-508B) Replaces R-13, R-502, and R-23

Suva® 95 is the industry standard long-term replacement for R-13, R-503 and R-23 in new and existing very low temperature (below -40°F) applications such as medical freezers and environmental chambers. Suva® 95 is the best choice to ensure optimum equipment reliability for these critical applications. It has zero ozone depletion and no phase out date.

Benefits :

Longer equipment life

Lower discharge temperature than R-23 increases compressor service life.

Increased cooling capacity

30% greater cooling capacity than R-13.

Perfect Match for R-503.

Lower retrofit cost than R-23.

Reduced inventory

One refrigerant replaces three.

Easy servicing

Can be repeatedly topped off, leak after leak.

Safe and easy to use

A1/A1 ASHRAE safety classification, EPA SNAP accepted. UL recognized.
